- **OTHERS**

PORGAPORCS

Vila-Sana, Lleida

Year: 2006

Volume : 11.500 t/year porc slurry, 4.650 t/year of residues

Digester volume: 1.360 m³ + 1.360 m³.

Energy production: Motor 199 kW, 1.592.000 kWh/año.

BIOVEC Staff done: Permits and grants, engineering, purchasing management support and execution of work and facilities.

SAT SANT MER

Sant Esteve de Guiabes, Vilademuls, Girona

Year: 2008

Volume : 6.530 t/year de cow slurry, 5.700 t/year of residues

Digester volume : 2.100 m³ + 1.360 m³

Energy production: Motor 370 kW, 2.960.000 kWh/año

BIOVEC has done: design, engineering and commissioning process.
BIOVEC permits and grants, project management and purchasing management. Currently performs supervisory duties.

TRAMAVE

Picassent, Valencia

Year: 2009

Volume: Aprox. 40.000 Tm/year of residues.

Energy production: 2 engines of 500 Kw, 80.000.000 kWh/year

BIOVEC performed: Design, detailed engineering, environmental clearance, procurement, site management on site, supervision of implementation and monitoring. Currently performed operation and supervision work. Currently performs supervisory duties.

URBILIZA RENOVABLES

Year: 2011

Volume: Aprox. 20.000 Tm/year of cow slurry and 3.000 tons of residues.

Energy production: 2 engines de 250 kW, 4.000.000 kWh/year

BIOVEC performed: Design, detailed engineering, procurement, site management in construction management and commissioning. Currently performed operation and supervision work.

MAS BES (GIRONA)

MAS BES Salitja (Girona)

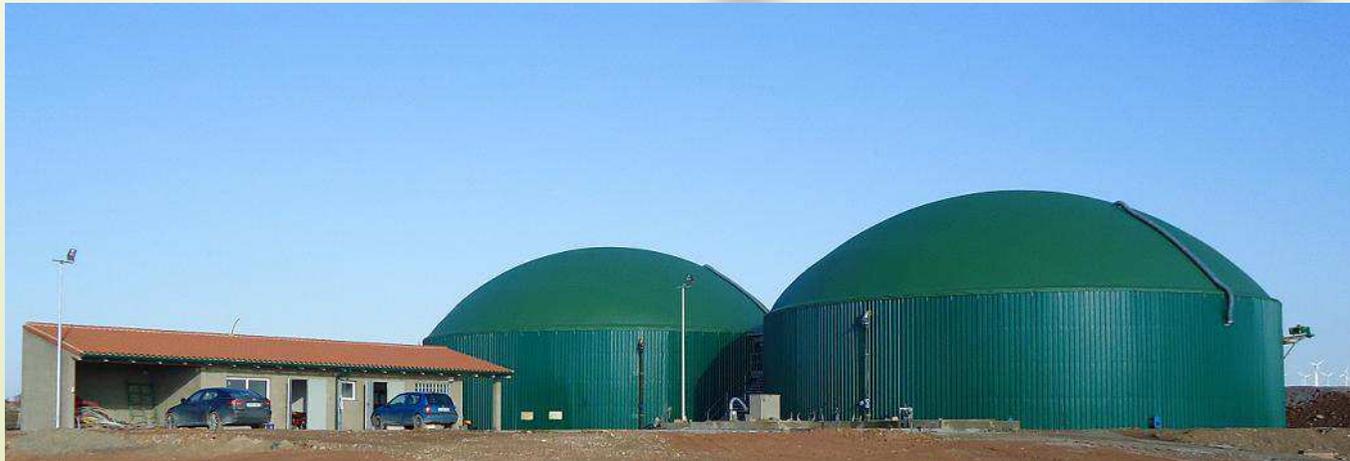

Year: 2010

Volume: Aprox. 8.500 Tm/year de deyecciones vacunas y 3.000 toneladas de residuos.

Producción de energía: 1 equipo de 250 kW, 2.000.000 kWh/año

BIOVEC ha realizado: Diseño, soporte y supervisión e puesta en marcha. Actualmente realiza labores de explotación y supervisión.

E-COGENERACIÓN CABANILLAS

Cabanillas, Navarra

Volumen tratado: Aprox. 12.000 Tm/año de deyecciones porcinas y 8.000 toneladas de residuos.
Producción de energía: 1 equipo de 370 kW, 2.900.000 kWh/año

BIOVEC ha realizado: Tramitación de permisos, diseño, ingeniería de detalle, gestión de compras, dirección de obras e instalaciones. Actualmente realiza labores de explotación y supervisión.

FINCA MOURISCADE

Lalín, Pontevedra

Year 2.012

Volume: Aprox. 1.500 Tm/year cow slurry and 500 tons of residues.

Energy production: 1 equipment of 60 kW.

BIOVEC performed: Permitting, design, detail engineering, procurement, construction management and facilities.

AGRONSELLA

Undués de Lerda, Zaragoza

Year 2013

Volume: 8.000 Tm/year of pork slurry.

Energy production: 1 boiler 140 kW.

BIOVEC performed: Permitting, design, detail engineering, procurement, construction management and facilities and commissioning.

ZADÍN Y CAPELLA

Zaidín y Capella, Zaragoza

Under construction

Mixture of pork slurry and residues

Energy production: Zaidín 750 kW, Capella 500 kW engines

BIOVEC performed: Detail engineering, construction assessment and facilities and commissioning.

SANTIENER

Iscar, Valladolid

Under construction
Mixture of pork slurry and residues
Energy production: 1 MW boiler

BIOVEC performed: Design, detail engineering, procurement, construction management and facilities and commissioning.

PILOT PLANTS AND TESTS

BIOVEC, has conducted four pilot plants AINIA, WB Engineers, Pata Negra and Ocyener biogas biogas.

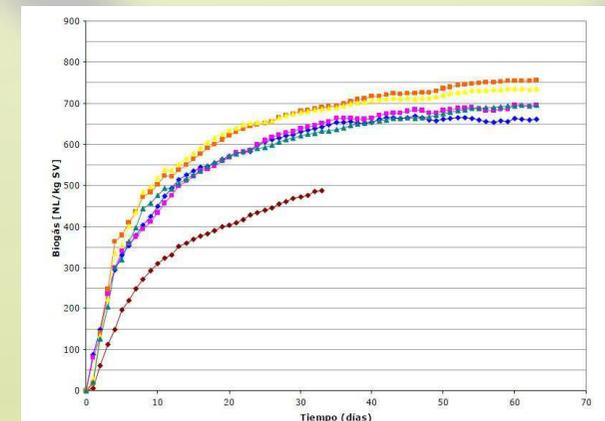

Biovec simultaneously and has participated in monitoring and testing of different test biogas generation.

Planta AINIA

Planta Biogas biogastur

**Ensayos potencial de prod.
En laboratorio externo (AINIA)**

EQUIPMETS

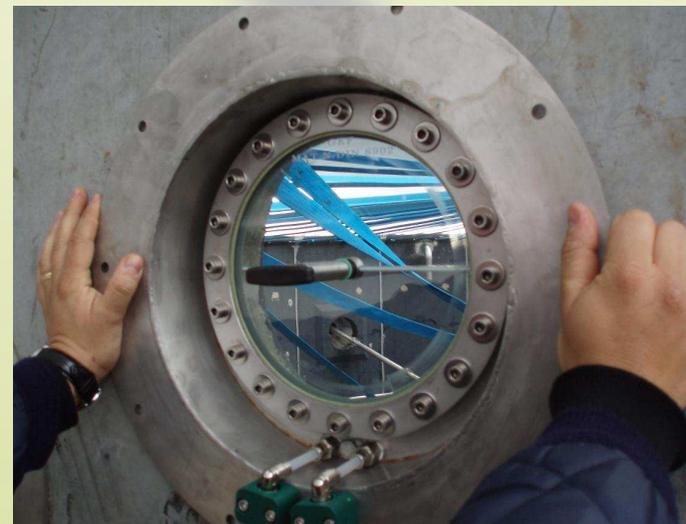

BIOVEC, dimensions, designs and manufactures special equipment for biogas plants, such as biological desulfurization systems, plant automation and control or peepholes.

Desulfurization

Milligas counter

glasses

OTHER

BIOVEC, is currently conducting a study to a region of China on the use of biogas and a new pilot biogas plant.

At the same time Biovec specific equipment performs different biogas plants and has developed an automation system of biogas plants.

We have experience in conducting feasibility studies and presentations on biogas technology and composting.
